

VISION

To save lives through the integration of cancer research, education and patient care. Through innovation and collaboration, the VCCC Alliance will drive the next generation of improvements in prevention, detection, treatment and survivorship for all.

ASPIRATION

Our alliance is a global leader in the transformation of cancer outcomes.

APPROACH

Catalyse

Coordinate diverse perspectives and expertise across alliance members and the sector to catalyse collaboration

Translate

Act as a conduit for effectively translating new evidence into practice

Advance

Advance improvements in policy, practice and equity

Include and involve

Consumer voices are fundamental to success

VALUES

Patient-centred

Bold

For All

United

Respectful

STRATEGIC GOALS 2024 - 2029

Collaborative research

Bring the best minds and organisations together to turn research into better cancer outcomes

Aims:

- Promising research and discoveries are accelerated through multi-partner collaboration
- New evidence-based care and treatments move quickly into clinical use
- Access to clinical trials becomes routine in cancer care

Data and technology

Drive better sharing of data and knowledge, and use of technology, so patients benefit from latest evidence and advances

Aims:

- Effective data connectivity and integration informs improvements in early detection, treatment, and care.
- Systems and governance structures enable and support collaborative research
- Innovative technologies are used effectively to enhance diagnosis and decision-making for treatments

Equitable care and outcomes

Ensure ALL patients have access to optimal care

Aims:

- People and systems are equipped and enabled to improve cancer outcomes for ALL Victorians, particularly underserved populations, and Aboriginal and Torres Strait Islander people.
- All Victorians affected by cancer can access timely palliative care to improve quality of life

Patient-powered

Integrate diverse consumer perspectives to improve research and care

Aims:

- Consumers are supported and empowered to inform cancer research and care
- Diverse consumer perspectives are harnessed and integrated into models of care (value-based care)

Leadership and learning

Upskill, support and inspire the cancer workforce to deliver world-leading outcomes

Aims:

- Healthcare professionals are supported to adopt evidence-based practices so they can excel in their work
- Victoria attracts, retains, and develops highly skilled health professionals across all cancer disciplines
- Nursing and allied health workforce is strengthened to deliver evidence-based cancer care across the patient's lifespan.
